

Excellence in Medical Device Testing Services

Human Factors Testing

When it comes to performing human factors testing, compliance is key to ensuring a cost-effective, timely solution. If you want to keep your product development on track, then MET can be your partner of choice to perform human factors testing with.

World-Wide Testing

MET are able to evaluate your product anywhere in the world. We have the capabilities to perform human factors testing in almost any country in a variety of use environments. If you require testing in the USA then MET can assist. If you require testing elsewhere for CE Marking MET can assist.

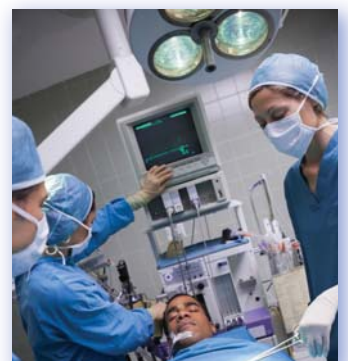

Global Compliance

- Compliance to IEC 62366 & 60601 international standards.
- Compliance to FDA Human factors guidance UCM259760.
- Compliance to ISO 14971 Risk Management standard.

Usable Products

MET are able to assist with your product development through to validation. We can work alongside your project team to develop usable products using the latest human factors and usability engineering methods and best practices.

MET delivers all this and more, in complete confidence
