

## ***What's New at MET – January 2010*** ***New solutions to your technical requirements***

### **New Address**

MET has moved. To further increase our efficiency we have combined our office and laboratory operations under one roof. You might be surprised how quickly we deal with your enquiries and orders. Our new contact details are:

MET Ltd, Yew Tree Studios, Stone Street, Stanford North, Ashford, Kent TN25 6DH, UK.

Tel: +44 (0)8454 588924 Fax: +44 (0)1303 813952

### **Force Measuring Equipment**

In support of our leak and flow testing range MET now supplies a robust range of force gauges. Amongst the many applications for this equipment are:

- Joint strength tests
- Tensile tests
- Insertion (or extraction) force gauging
- Torque measurement

This equipment also allows us to compliment packaging burst testing with a 'seal peel' test.

### **New Regulatory Services**

The application of a good regulatory strategy can often lead to a significant reduction in project time scales and costs as the process can be used to keep safety testing requirements to a minimum. To guide your product to market, MET offers the services of experts, and one of our particular strengths is toxicological risk assessment.

### **Stent Testing Presentation**

MET made a presentation on medical device and stent testing at the 'Medical Device Manufacture - Fine cutting / Precision Manufacturing' workshop. The meeting was held by the Association of Laser Users at Manchester University on the 24<sup>th</sup> of November 2009. Details of the presentation are available from MET on request.
