

**Medical Device Leak Testing Guide
from Medical Engineering Technologies**

MET has recently published a new guide to leak testing for medical devices. The guide explains the various techniques for leak testing. It discusses their application to medical devices and packaging. The various methods are compared and contrasted, assessing which is most applicable to apply in various situations.

The guide is located at
<http://www.medical-engineering.co.uk/documents/leak-test-guide.pdf>

MET supplies all types of leak testing equipment. Our laboratory provides leak testing and validation services for products and packs.

For ongoing QA requirements MET offer a unique low-cost burst test machine as well as a variety of other test equipment. Details of our medical device testing equipment and services are available at www.medical-engineering.co.uk
